ROAD MAP TO AGENDA 2030

Objective n. 2, 3, 15

It is in line with, and supports the goals of the European Green Deal, Farm to Fork strategy and Bioeconomy strategy. Food 2030 is underpinned by the need to foster a multi-actor and systemic approach to research and innovation capable of delivering co-benefits for people's health, our climate, our planet and communities.

Relatore: Federica Dallanoce, Vice Presidente Nazionale Adaci

Agenda  **Datum:** 1 Dec 2023 

Location: Villa Braida – Treviso Italy

Some data ?

- Population in Italy with adequate nutrition

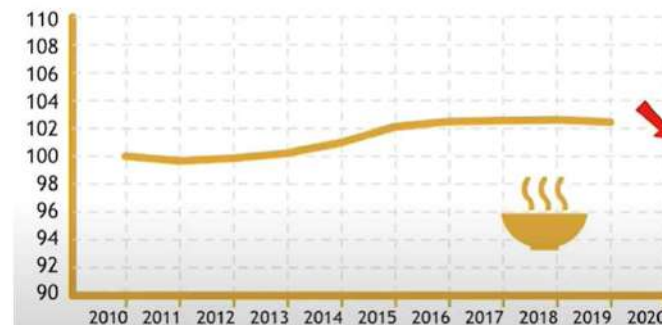

(Adequate = 4 meals a day)

17,5 % nel 2015

Poverty, Health and Climate Crisis are the challenges to the sustainability of future growth and development. Food production and consumption play a decisive role.

IMPATTO CRISI PANDEMICA

Three focal points: a systemic approach

In the following the aims and expected results of these actions are described below:

- increase food loss awareness
- develop local food policy
- take care and reduce food waste
- increase positive ecosystem for agricultural perspectives
- to learn good practices for reducing food waste

"Ending hunger, achieving food security, improving nutrition and promoting sustainable agriculture"

- To act with actions of recovery of food resources and redistribution to people in difficulty (also thanks to the central role of Third Sector structures), to overcome food poverty, as well as introducing price reduction measures through commercial innovation strategies
- Intensify awareness-raising and food education campaigns, including information actions aimed at directing people towards baskets of basic necessities with a better quality-price ratio.
- Activate labelling systems to enable consumers to choose healthy and sustainable nutrition.
- Strengthening urban food policies (known as Food Policy, Food Strategy, Urban Food Planning), that is a coordinated set of tools, actions, measures and incentives that orient food systems towards a balanced relationship between development

Name of the project:

Overview Project

- PR1
 - PR1: Food Waste Analysis
- PR2
 - PR2: Minecraft for Food Waste Education

Co-funded by the
Erasmus+ Programme
of the European Union

2021-1-NL01-KA220-SCH-000034410

PR1: Food Waste Analysis (done)

- Methodology of the Analysis:
 - Objective: Establish a unified approach for food waste analysis.
 - Deliverables: Work division, activity calendar, templates, and instructional materials.
- Analysis at School Level:
 - Collaborative effort with schools to conduct research on various aspects of food waste.
 - Deliverables: Interview reports and insights on food waste causes, habits, and best practices.
- Analysis at Partner Level:
 - Partner organizations conducted focus groups, gathering data from various food industry stakeholders.
 - Deliverables: National and transnational reports on food waste.
- Methodology - Enquiry-Based Learning (EBL):
 - An adaptive research approach allowing participants to focus on their interests

Co-funded by the
Erasmus+ Programme
of the European Union

2021-1-NL01-KA220-SCH-000034410

PR2: Minecraft for Food Waste Education

(In Progress)

- **Creation of the FoodWaste Minecraft World:**
 - A custom Minecraft world designed to support Project-Based Learning challenges related to food waste.
 - Elaboration of Game Mission:
 - A comprehensive game scenario developed using insights from PR1.
- **Game Content and Resources:**
 - Game content aligned with the BAFOS program's lesson structure.
 - Deliverables: Resources, resource packs, and game modifications.
- **Instructional Material and Guide:**
 - Comprehensive materials developed for ease of use, accessible via the FoodWaste Foundry virtual space.
- **Dry Runs & Validation Release:**
 - An iterative approach to game development, involving internal testing and valid on feedback..

What is Minecraft and why are we using it?

- One of the world's most popular videogames since 2011.
- Sandbox' game- **players create their own experience** by interacting with the game's virtual world.
- Users explore different landscapes and build things with blocks.
- Minecraft can be played in five modes- survival, creative, adventure, spectator and hardcore

Co-funded by the
Erasmus+ Programme
of the European Union

BAFOS

Boosting school Awareness about FOod loSs

MINECRAFT

- Survival or Creative mode
- Teaches creativity and finding solutions
- Single player vs multiplayer

MINECRAFT EDUCATION

- Custom versions of the game designed specifically for teachers and students with many extra features that support classroom use
- Free library of worlds/levels/activities that can be used to teach a variety of subjects

Co-funded by the
Erasmus+ Programme
of the European Union

BAFOS FINAL PROJECT :

The BAFOS Project Final Event is just around the corner, and we can announce that attendees can join us either online or onsite. This is a unique opportunity to dive into the world of sustainability and innovative gaming solutions for food waste education.

Event Details:

- **Date:** January 17, 2024
- **Time:** 1:30 PM - 5:00 PM
- **Venue:** Connect College, Echt, The Netherlands
- **Virtual Access:** Online streaming link provided upon registration
- **Highlights:** Expert talks, interactive Minecraft game session, valuable networking opportunities, and more!
- We have prepared an eye-catching flyer (attached below) to help spread the word. We kindly ask for your assistance in sharing this flyer within your networks, social media platforms, and with anyone who might be interested in this impactful event.

Registration is Open for Both Online and Onsite Attendance! Direct participants to www.bafos.eu/finalevent for easy and free registration.

BAFOS

Boosting school Awareness about FOod IoSs

Before we play

Navigation

Once you opened the world, you will need to navigate the game. The navigation is possible using your keyboard and mouse. The buttons of the keyboard to be used are:

- W – Move Forward
- A – Move Left
- S – Move backward
- D – Move right
- SPACE - Jump (Double SPACE to fly when runs in the creative mode)
- E – Open Inventory
- Q – Throw selected object
- T – Open the chat
- C - Open Code Builder
- / - Open chat and automatically add first character as "/"

BAFOS Project Final Event

- Date:** January 17, 2024
- Venue:** Connect College, Echt, NL
- Time:** 1:30 - 5:00 PM

Join Us For:

- Insightful Talks & Project Showcase
- Interactive 6 Minecraft Food Waste Game
- Networking & Idea Sharing

Why Attend?

- Learn about sustainable practices
- Engage in fun, educational gaming
- Connect with experts & peers

Free Admission!
