Finally, it is again possible to tour the production lines of the **Montecchio site**, in Italy, a world class manufacturing hub focused on producing highly efficient water technologies that use less energy, reduce life cycle costs and provide environmental benefits to users and the communities in which they operate.

## About Lowara

- > Founded in 1968 in Montecchio Maggiore, Italy, the Xylem's site is recognized as a world leader in stainless steel manufacturing
- > **Lowara** branded, pumps produced in Montecchio are manufactured in AISI 304 and 316 fabricated stainless steel using laser technology for a diverse range of markets, including commercial building service, industrial, agricultural and residential.
- > The range of pumps includes vertical and horizontal multistage, in-line, end suction close coupled, peripheral turbine, submersible borehole, drainage and sewage pumps, as well as booster and domestic pressure systems.
- > The site's production stands out in the market as innovative, based on the constant use of materials that not only ensures the durability of its products, but also respects the health of people and the environment.

## About the tour

- > Tours are tailored to the needs of our guests, who can visit the facility for one or more days, up to a maximum duration of 3, where both firsthand experience to observe products being manufactured and processes at work, alongside in class trainings are offered
- > Xylem Learning Center offers various classes and is available for employees, consultants, engineers, installers, distributors, dealers and OEMs.
- > These educational sessions are designed to provide attendees with extensive, hands-on experience in a state-of-the-art demonstration classroom with training on actual installations to help gain valuable troubleshooting skills.

**AISI**  
304 & 316  
Fabricated stainless steel

## About the opportunity

- > The chance to explore our manufacturing site in Montecchio Maggiore will provide some valuable insight into our pump production processes.
- > At the Montecchio site, Xylem meets the world's most critical water challenges head-on by engineering the broadest portfolio of products and services through product excellence, technology innovation and continuing commitment to R&D.
- > Curious to see what to expect? Take a look to the 2022 Factory tour video [HERE](#)
